sorularından hangilerinin araştırmaya değer olduğunu da seçmektedir. Böylece süreç öğretene değil, öğrenene bağımlı bir nitelik kazandırmıştır. Araştırma-sorgulamaya dayalı öğrenmede, öğrenme faaliyetini yapan kişi, bilimsel olarak biçimlendirilmiş sorular araştırmak ve incelemekle ilgilenir, toplanan verilere dayanan açıklamalar ve daha önce edinilmiş bilimsel bilgiyle kurulan bağlantıları doğrular, daha sonra da buldukları sonuçları bildirir ve gerekçelendirir (Natioanal Resarch Council [NRC], 2000).

ilkokullarda öğrenci sayısının artmasına neden olmuş, kapalı ve açık mekân gereksinimini artırmıştır. Bu süreçte yeni yapılacak eğitim yapılarına yönelik, Millî Eğitim Bakanlığı'nca ihtiyaç programları dikkate alınarak, tip (örnek) projeler hazırlanmakta ve uygulanmaktadır. Ayrıca ilkokul öğrencilerinin gelişim özellikleri incelendiğinde bu öğrencilerin Piaget'in (1954) gelişim dönemlerine göre somut işlemler döneminde olduğu, bu bağlamda somut yaşantılara ihtiyaç duyan ve yaparak yaşayarak öğrenen bireyler oldukları görülmektedir. Bunun için ilkokul öğrencilerinin eğitim gördüğü okulların ve bahçelerinin çocukların gelişim özelliklerinin dikkate alınarak düzenlenmesi gerekmektedir. Dolayısıyla, okul bahçelerinin "öğrenme mekânlarına" dönüştürülmesine yönelik ilkelerin tanımlandığı Tasarım Rehberleri'ne, buna bağlı oluşturulacak Master Plan yaklaşımına ve bu yaklaşıma yönelik olarak eğitim müfredatında düzenlemelere gereksinim vardır.

değerlendirilmesi nedeniyle okul bahçesinde fazla sayıda teneffüs kazalarının olması şaşırtıcı sayılmamaktadır.

Okul bahçelerinin öğrencilerin teneffüs zaman dilimlerinde dahi etkili bir şekilde kullanabilecekleri koşullarda tasarlanmaması öğrenme mekanı olarak kullanılmasına ve çağdaş öğrenme ve öğretme kuramları çerçevesinde bir ortamın sağlanmasına da imkan vermemektedir. Okul bahçeleri, öğrencilerin günlük yaşamlarında uzun bir süreci kapsamasına rağmen, okul bahçelerine gerekli önemin verilmediği görülmektedir. Okul bahçelerinin sadece teneffüslerde kullanılmaması için gerekli tasarımların dahil edilerek öğrenme mekanlarına dönüştürülmesi öğrenme sürecine önemli katkılardan birisi olacaktır. Okul bahçelerinin öğrenme mekanı olarak kullanılması, beraberinde gerekli öğrenme ve öğretme kuramlarının da etkili bir şekilde kullanılmasını kolaylaştıracaktır. Öğretmenler öğrenme yaklaşımlarını sınıf dışına taşıyarak daha kolay uygulanabilir olduğunu ve sadece bir mekanda sınırlı olmadıklarını fark ederek etkili öğrenmeler gerçekleştirecekleri düşünülmektedir. Araştırmalar incelendiğinde, okul bahçelerinin öğrenme mekanları olarak kullanılması ve tasarlanması sürecine yönelik çalışmalara rastlanmamıştır.

Altyapı Bölgeleri: Mevcut okullarda altyapı düzenlemeleri genellikle aydınlatma, içme suyu, yağmur suyuna yöneliktir. Ancak özellikle gelişmiş ülkelerde sürdürülebilir teknolojilerin pek çok alanda olduğu gibi okul alanlarında da kullanılması yaygınlaşmaktadır. Bu sistemlerin okul alanlarında uygulanması toplumda sürdürülebilirlik bilincininyerleşmesinde etkilidir. Bu uygulamalarla erken yaşta tanışan öğrencilerdoğaya duyarlı birer birey olarak yetişebilmekte ve aynı zamanda okullarda enerji tasarruflarısağlanabilmektedir.

markete doğru beslenme için koşarak gittikleri, bir kısım öğrencinin ise okulun 2. katındaki yemekhanede yemek yedikleri gözlemlenmiştir. İlk 20 dakika sonunda genellikle öğrencilerin yemek ihtiyaçlarını karşılayıp, sonrasında bahçede dolaşma, potaya top atma gibi aktiviteler yaptıkları belirlenmiştir (Şekil 12).

Dördüncü teneffüste, oyun ve fiziki etkinlikler dersi kapsamında dışarıda iki sınıf öğretmenleri ile, çeşmenin bulunduğu alanın yakınında etkinlik yaptıkları gözlemlenmiştir. Bunun yanı sıra dersten çıkan diğer öğrencilerin ise, öğle teneffüsünde bahçede bıraktıkları top ile top sektirme oyununa devam ettikleri, kız öğrencilerin ise bahçenin ortasında voleybol oynadıkları görülmüştür (Tablo 5).

Sonuç olarak, Pınaraltı Keleşli ilkokulunda yapılan gözlemlerde öğrenci sayısının az olması nedeniyle öğrenci davranışlarını izlemek diğer okullardan daha kolay olmuştur. Doğa içerisindeki bu okulda kent merkezi ve çeperdeki okullara nazaran öğrencilerin teneffüse çıkarken son derece sakin bir davranış sergiledikleri görülmüştür. Aynı zamanda, diğer okullarda kalabalık öğrenci sayısından kaynaklı güvenlik nedeniyle okul bahçesinde top oynamak yasakken bu okulda serbest olduğu görülmüştür. Okulda öğrenciler arasındaki sosyal paylaşımın diğer okullara oranla daha fazla olduğu izlenmiştir, çekişme ve rekabet gibi davranışlara ise rastlanmamıştır.

düzenlenmiştir. Okulun batı sınırında yer alan mevcutta da öğrenciler tarafından yoğun bir biçimde kullanılan çeşme, toplanma ve odak noktası olarak yeniden tasarlanmıştır.

Pasif aktivitelere yönelik etkinlik alanları bahçenin kuzey ve kuzey-batı sınırı boyunca ve eğitim yapısının etrafında düzenlenmiştir. Bu alanlar öğrencilerin yeme- içme, okuma, izleme gibi aktivitelerine yönelik, masa ve bank gibi ekipmanlarla donatılmıştır.

Bahçede öğrenme etkinliğinin en yoğun olarak gerçekleştiği mekanlar tematik bahçelerdir. Bu doğrultuda okul bahçesinde matematik, türkçe, fen ve dramaya yönelik ortak tematik bahçeler tanımlanmıştır. Bunun yanı sıra bahçenin güney duvarına bitişik olacak şekilde dış derslikler tanımlanmıştır. Dış dersliklerin cephesi cam ve açılabilir yüzeylerden oluşmaktadır. Bu yapılar olumsuz hava koşullarında da türkçe, hayat bilgisi ve drama gibi ders etkinliklerinin bahçede yapılmasına olanak sağlayan bir öğrenme mekânı niteliğindedir.

Tüm bu süreçler sonucunda okullara özgü üretilen Master Planlar, Projenin süreci ve sonuç ürünleri oluşturulan internet sitesi aracılığıyla ve yapılan seminer ve çalıştay faaliyetleri ile tüm ilgili paydaş grupları ile paylaşılmıştır. Bu çerçevede 10 Haziran 2019 tarihinde Seminer ve çalıştay etkinliği yapılmıştır. Bu etkinliğe Milli Eğitim Bakanlığı, Çevre ve Şehircilik Bakanlığı, Planlama ve Tasarım konusunda çalışan akademisyenler

İl Milli Eğitim Müdürlüğü, Çevre ve Şehircilik İl Müdürlüğü, Yerel Yönetim Temsilcileri, Meslek odaları temsilci ve üyeleri, İnşaat Sektöründeki Aktörler, Eğitim, Planlama ve Tasarım konusunda çalışan akademisyenler, okul yöneticileri ve öğretmenler katılmıştır. Etkinliğin ilk kısmı olan seminerde katılımcılara proje süreci ve proje kapsamında ortaya konulan yaklaşım ve sonuç ürüne ilişkin bilgiler verilmiştir (Şekil 10).

way and obey both the religious rules and the principles that an administrator should instruct.

Obligations of individuals to one another were mostly written in the record using the religious texts. As there is an ethereal response to fulfilling the religious rules, they are necessary in organizing social relationships. It is seen that the duties and responsibilities of society are determined in official documents and include penal sanctions.

Inside the determined historical process, it is seen that similar understandings had become dominant in the communication of individuals, for relationships, "good" and "bad," "right" and "wrong" followed in the same direction. Religious beliefs and new culture areas were redefined, and these criteria were explained within the framework of their identities and rules.

the reader the failure of communication. The absurd plays are the plays in which ordinary dialogues are not seen commonly. Instead of usual speech, the playwright chooses the gap in the dialogue. Hence, these words obstruct the flow of the speech continuously. The meaningless and the futile world is attempted to be reflected in the minds of the reader with disconnected speech. Another reason of use of these words could be related to creating curiosity in the reader. The reader who meets these words in the plays starts to comprehend the scene and interpret it. Hence, the playwrights could guide the reader to include the play through these gaps.

Table 1: The relationship between concrete compressive strength and water/cement

f_c (MPa)	15	20	25	30	35	40	45	50	55	60	65	70	75
w/c	0.8	0.7	0.62	0.55	0.48	0.43	0.38	0.35	0.34	0.33	0.32	0.31	0.29

RESULTS

Segregation is one of the most common problems in concrete production. This problem is more common in vertical elements such as columns and walls, where the vibrator enters with difficulty. No matter how well designed some concrete in which segregation occurs, there will be a serious decrease in its strength. Therefore, the concrete must be well compacted so that segregation does not occur. SCCs fill the mould without the need for any vibration as they are self-compacting. Therefore, it provides the compressive strength determined in its design and exhibits the desired performance. SCCs can be preferred over normal concrete as they save time and labour.

Such centres can also serve to other grocery stores and other stores in the city as well. Even though this research investigated construction logistics centres, the scope of such centre can be broadened in which case it can be urban consolidation centre. Consequently the reduction in number vehicle trips within the city and CO2 emissions would be greater. Establishing such centres in the cities is strongly recommended(Paddeu, 2017). Furthermore, if it is possible, utilizing electric truck would decrease the CO2 emission even more dractistically as the emission of electric trucks significantly less than diesel engine trucks. Even though in the near future electric trucks and UAV's will become more commonly used and available to the more people. Establishing consolidation centres as reviewed in this study, will still be wise step towards sustainable transportation and sustainable cities.

and should be treated with respect. This conclusion and many others is the very essence of cultural communication.

By understanding the importance of *Tahlilan* as local wisdom of Javanese society, it can be concluded that *Tahlilan* has a crucial role to solidify the strengthen cohesion among Muslims whether they come from different degrees of piety. İt is also a necessary tradition to help the bolster the communication of culture among the Javanese people and those who are not from their ethnic tribe.

For a last word, it should be noted that *Firar* is significant in the sense it is one those popular media products that gives voice to "others", excluded from Turkish mass media for a long period. However, what is disturbing is the very fact that the serial contributes a great deal to the crafting of "otherness".

CONCLUSION

Regarding the crisis of the Kardak Cliffs, the action of planting flags by the reporters of the Hürriyet newspaper and the fact that the news published in the written and visual media, especially Hürriyet, was carried from the "War" dimension to the "War" dimension directly, directly affected the public. Therefore, it is possible to say that the media is an extremely important actor in this crisis for Turkish political history. In particular, the tension between the two countries has climbed to the struggle dimension, especially with the marginalization of Greece as a discourse and the use of exaggeration themed headings at macro level. In a sense, the media has fulfilled the function of community engineering in this crisis very well and the discourse it uses the most important sovereignty of the Turkish nation with the flag elements, the public opinion of the public opinion of the crisis of the impact of the concern dimension.

of news language in order to avoid discrimination against the disabled in the media. In this sense, it is extremely important to adopt a journalism approach that is free from prejudices, discriminatory language and discourses towards the disabled, and to spread the human rights-oriented journalism approach that makes the rights and demands of the disabled visible.

is stay up. In addition to lack of belonging, there emerges lack of communication, alienation and eventually identity crisis. With this identity crisis, Yank, who sees himself as a part of that society and one of the most important elements, an indispensable role, is disoriented, unable to recover itself, and ultimately tends to a destructive action.

- Anne ve babam ayrı yaşıyorlar.
- Karadeniz bölgesinden geldim. (diğer bölgeler de sayılabilir)
- Sevdiğim birini kaybettim.
- Ciddi bir hastalık geçmişim var.
- Kendimle barışık olduğumu söyleyebilirim.
- Sabırlı/sabırsız biriyim.

4. Önceden sınıftaki öğrenci sayısı kadar kart hazırlanır. Her bir kartta bir ifade yer almalıdır. Örneğin, masa tenisi oynayan biri, yurt dışına çıkmış biri, yabancı dil konuşabilen biri, sufle pişirebilen biri, on şiiri ezbere okuyabilen biri, gibi ifadeler kullanılabilir. Sorular çeşitlendirilebilir. Kartlar öğrencilere rast gele dağıtılır ve bu ifadelere uygun olan kişilerin verilen süre içinde sınıfta dolaşarak bulmaları istenir.
5. Bu etkinliğin bir başka versiyonu da şu şekilde düzenlenebilir. Tahtaya sorular yazılır ve her öğrencinin sınıfta dolaşarak her soruyu en az üç kişiye verilen süre içinde sorması ve cevapları ellerindeki kağıda yazmaları istenir. Aşağıdaki soruları kullanılabilir. Ya da çeşitlendirilebilir.
   - Yapmaktan çok hoşlandıkları iş nedir?
   - Dünyadaki en çok tanışmak istedikleri kişi kimdir ve neden?
   - Dünyada en çok yaşamak istedikleri yer neresi?
   - Hayatları hakkında grupla paylaşmak istedikleri alışılmadık veya heyecan verici bir şey var mı? Varsa nedir?

en fazla 2 hafta devamsızlık yaparak 24 ile 28 arası ek puana kadar alabilecektir. Bunun dışında öğretim elemanı öğrencilere ders içinde her hafta görevler vererek katılımı sağlamakta ve bunu vizeye ve finale ek puanla desteklemektedir. Bu durum öğrencinin derse katılımını sağlamakta, derse katılan öğrenci daha çok öğrenmekte, öğrenen öğrenci ek puan alarak ödüllendirilmektedir.

yönelik deneysel sonuçlar olduğu rapor edilmektedir (Naylor ve Keogh, 2013:7). Dolayısıyla kavram karikatürlerinin öğrenme ortamlarının etkililiğini artıran önemli bir öğretim materyali olduğu söylenebilir.

Hemen hemen tüm öğretim materyallerinde olduğu gibi kavram karikatürlerinin de hazırlanması geçmişe kıyasla daha kolay hale gelmiştir. Günümüzde kavram karikatürü hazırlamak için kullanılabilecek çeşitli Web 2.0 araçları mevcuttur. Bu Web 2.0 araçlarından bazıları şunlardır;

- Canva
- Chogger
- Make Belief Comics
- Pawtoon
- Pixton
- Strip Creator
- Strip Generator
- TonDoo
- Toonlet
- Witty Comics!
- Write Comics

Sonuç olarak ifade etmek gerekirse, kavram karikatürleri ve diğer öğretim materyalleri diğer tüm öğretim seviyelerinde olduğu gibi yükseköğretimde de eğitim öğretimin önemli bir bileşenidir. Yerinde ve doğru bir şekilde kullanıldığında tek bir materyal saatlerce anlatılsa bile anlaşılmayacak bir konunun çok basit ve anlamlı bir şekilde öğrenilmesini sağlayabilir. Dolayısıyla öğretim elemanları derslerini etkili öğretim materyalleri ile zenginleştirme ve daha öğrenci merkezli öğrenme ortamları oluşturma gayreti içerisinde olmalıdırlar. Böylelikle yükseköğretimde eğitimin niteliğinin artırılması için küçük ama önemli bir adım atılmış olacaktır.

kanunların çıkması gerektiğini, harita üzerinde açıklayarak anlatır. Daha sonra her bir kanunu tartışmaya açar. Gruplar kendi aralarında tartışır ve ortak bir görüşte uzlaşmaya çalışırlar. Eğer ortak bir görüşte uzlaştılarsa grup sözcüsü ilgili emojiji grubu adına kaldırır. Grubunun görüşünü açıklar. Eğer grup üyeleri ortak görüşte birleşemezlerse grup üyesi bireysel olarak görüşünü belirtir.

4. Değerlendirme:

Bütün gruplar görüşünü açıkladıktan sonra her gruptan görüşleri üzerinde tekrar tartışması istenir ve daha sonra fikirlerinin değişip değişmediği sorulur. Gruplar diğer grupların düşüncelerinden etkilenip fikirlerini değiştirebilirler yada aynı görüşü savunmaya devam edebilirler.

Örnek etkinlikte aynı uygulama yapılmış ayrıca bu aşamada ayrıca gruplardan kanunları önem sırasına göre merdiven gibi sıralamaları istenmiştir. Gruplar en önemli gördükleri kanunun yazılı olduğu kartı en üste, önem derecesine göre en önemsiz gördüklerini en alta koyarak sıralamışlardır. Daha sonra grup sözcüleri tahtaya çağırılmış ve merdivenlerini tahtaya asmaları istenmiştir. Her grup yukarıdan aşağıya doğru kartları merdiven sıralaması ile tahtaya asmış gruplar arasındaki farklılıklar ve benzerliklere bakılarak kanunlara ilişkin görüşler netleştirilmiştir.

rasyonel olma sadece bilişsel alanda makul görüşleri ifade eden ve buna bağlı olarak hareket eden kişiler için kullanılsa da rasyonalite, yapılan hatalar, öne sürülen hipotezlerin çürütülmesi ve girişimlerin başarısızlığı gibi deneyimler üzerinden öğrenme ile ilişkilendirilmediğinde anlamını yitiren bir zihinsel bir durumdur (Andrews, 2010; Andriessen, 2009). Bu nedenle bu deneyimleri yaşamaya imkan veren argüman ve tartışma kültürü öğrenme süreçlerinde önemli bir rol oynar.

Diğer yandan üniversitenin sosyal bir göndermesi olan 'özgür düşünme ortamları' olarak nitelendirilmesi, tartışma kültürünün üniversite ikliminin temel bir bileşeni olduğunu göstermektedir. Bu bağlamda hem bilim üreten ve bilimsel bilgileri öğretime taşıyan hem de öğretim ortamlarında tartışma kültürünü diri tutan bir misyona sahip oldukları düşünüldüğünde bilimsel açıklamanın (tartışmacı) argümantatif doğası kaçınılmaz olarak üniversite eğitiminin önemli bir parçası olmalıdır. Başka bir ifade ile argümantasyon üniversite öğretim hayatının önemli bir aracı olabilir. Tartışma, diyalog, sosyal etkileşim, iletişim, ikna, düşünme gibi kavramlarla açıklanan argümantasyon sadece bilimsel konuları değil genel anlamda insanların ilgilendiği tüm konular hakkında gerekçeli olarak yürüttükleri tüm tartışmalar için kullanılabilir bir terimdir. Öğrenme süreçlerinde argümantasyonun temel amacı öğrenmek için tartışma veya tartışarak öğrenme ile bir alanı daha iyi anlamaktır (Andriessen, 2009). Argümantasyonun bilimsel tartışma ve diyalog odağında üniversite eğitiminde önemine yönelik bir farkındalık oluşturmak amaçlandığı bu bölümün sonunda temel iddiamız 'tartışma kültürü' denildiğinde ilk akla gelen yer olan üniversitede ve üniversite eğitiminde argümantasyonun dikkate alınmasının mümkün ve gerekli olduğudur.

(f) Çözüme ulaşmak. Gruplardan çözümün son halini oluşturmaları ve çözümün gerçek yaşam durumlarında etkililiğinin değerlendirilmesine yönelik bir değerlendirme planı hazırlamaları istenir. Hazırlanan değerlendirme planı önce eğitici ile müzakere edilir, ardından diğer grupların katıldığı bir toplantıda müzakere edildikten sonra son hali verilerek test edilir.

(g) Sonuçları sentezlemek ve yansıtmak. Öncelikle gruplardan kendi içlerinde, daha sonra eğitici ve tüm sınıfın katıldığı toplantıda sonuçlar hakkında bilgilendirmelerde bulunmaları istenir. İPÇ sürecinde, geliştirdikleri projede ve etkililiğin değerlendirilmesinde neler öğrendikleri, hangi bilgi ve becerilerde geliştikleri, geliştirilmeye açık becerileri hakkında yansıtıcı değerlendirmede bulunmaları öğrencilere belirtilir.

(h) Ürünü ve süreci değerlendirmek. Bu aşamada, bireysel değerlendirmeler, akran değerlendirmeleri ve grubun sürece ve ürüne yönelik değerlendirme raporları eğiticiye teslim edilir. Eğiticinin katılımı ile her grupta bir değerlendirme toplantısı yapılarak hem üyeler hem de eğitici dönütlerini paylaşır.

(i) Kapanışı gerçekleştirmek. Büyük grubun katılımıyla bir kapanış eğlencesi organize edilir. Eğitici tarafından üyelerin katılımını ve çabalarını onurlandırmak amacıyla tüm grubun fotoğrafının olduğu katılım belgeleri hazırlanarak verilir. Ayrıca çözümlerin yaygınlaştırılması amacıyla etkililiği değerlendirilmiş çözümler 20 dakikalık bir videoda özetlenir ve bu video medya ile paylaşılır.

doğru yanıt '1', yanlış veya boş bırakılan yanıt '0' olarak kodlanır. Elde edilen puanlar üzerindeki şans başarısının etkisi *düzeltme formülü* ile ortadan kaldırılabilir (Turgut ve Baykul, 2012; Sönmez, 2012; Tekin,1996).

Çoktan seçmeli madde yazarken kullanılabilecek Kontrol Listesi Tablo 4'te sunulmuştur.

Tablo 4. Çoktan seçmeli madde yazımında yararlanılabilecek kontrol listesi

Değerlendirme Ölçütleri		Evet	Hayır
1.	Madde türü ölçülmek istenen kazanım için uygun mudur?		
2.	Madde tek bir problemi ölçmekte midir?		
3.	Madde kökünde gereksiz bilgiler bulunmakta mıdır?		
4.	Madde kökünde olumsuz ifadelerden bulunmakta mıdır?		
5.	Madde kökünde negatif ifadeler kullanılmışsa, bu ifadeler belirginleştirilmiş midir? (altı çizili, koyu renk vb.)		
6.	Seçenekler madde kökü ile dilbilgisi ve yazım kuralları açısından uyumlu mudur?		
7.	Seçenekler açık, net ve kısa ifadelerle yazılmış mıdır?		
8.	Seçenek uzunlukları benzer midir?		
9.	Madde tek bir doğru cevabı içermekte midir?		
10.	Çeldiriciler bilen ve bilmeyen öğrencileri ayırt etmekte midir?		
11.	Seçenekler, doğru cevaba ait ipucu vermeyecek şekilde hazırlanmış mıdır?		
12.	*Yukarıdakilerden hepsi* veya *Yukarıdakilerden hiçbiri* seçenekleri kullanılmış mıdır?		
13.	Maddeler öğrencilerin yaş-seviyesine uygun mudur?		
14.	Her bir madde diğerlerinden bağımsız mıdır?		

(Linn ve Gronlund, 2000)

verilen bir hormon salgılanır. Renin karaciğerde bulunan plazma proteinlerinden olan anjiyotensinojeni, anjiyotensin I'e dönüştürür. Anjiyotensin I, akciğerlerde ACE enzimlerinin etkisiyle anjiyotensinojen II ye dönüştürür. Anjiyotensinojen II ise adrenal kortekste aldosteron salınımın uyarır. Ayrıca anjiyotensin II, damarların düz kas tabakalarında kasılma sağlayarak vazokonstrksiyonu sağlar ve azalmış kan basıncını arttırır. Aldosteron eksikliği sonucu kanda başta potasyumun artışı sonucu kalp kontraksiyonu zayıflar ve aritmi gelişir. Bu sebeple aldosteron hayati önem taşır.

Zona fasciculata'dan ise glukokortikoidler salınır. En çok bilinen glukokortikoid kortizol, kortizon'dur. Kortizol; glukoneogenezisi arttırır, alerjik reaksiyonları baskılar, protein sentezi ve inflamasyon bölgesinde enzim aktivitesini azaltır.

Zona reticularis'ten gonakortikoidler salınır. Özellikle erkeklik hormonu olan androjen ve kasınlarda ostrogen'i üretir.

Adrenal medulla ise daha iç kısımda bulunan öz kısmıdır. Burada bulunan kromaffin hücrelerin salgıladıklarına katekolaminleri (Adrenelin ve noradrenalin çok azda dopamin) sentezler, depo eder ve gerektiğinde sempatik kontrolle kana bırakır. Noradrenalin; damarlarda vazokontrüksiyon yapar, kan basıncını yükseltir, kalp atışını hızlandırır. Adrenalin ise koroner arterler ve iskelet kasını besleyen arterlerde vazodilatasyon sağlarken, noradrenalin koroner arterlerde dilatasyon diğerlerinde vazokontrüksiyon oluşturmaktadır [1-6, 16]

Plateletlerin Görevi;

- Pıhtılaşmada gerekli olan kimyasal maddeleri taşırlar, gerekli faktörleri salgılayarak pıhtılaşmayı başlatırlar ve düzenlerler.
- Hasara uğrayan kan damarı çeperinde geçici tıkaç oluştururlar.
- Pıhtı oluştuktan sonra aktif olarak kasılırlar.

Bu şekilde pıhtı küçülür ve hasarın çapı azalır (65).

gerekmektedir. Bu program doğrultusunda multidisipliner bir şekilde oluşturulan ekiple fonksiyonel bir çalışma ortamı planlanıp geriatrik bireyin tedavisinin ve yaşam kalitesinin artırılması sağlanmalıdır.

Rehabilitasyon programının merkezinde geriatrik bireyin kendisi bulunmalıdır ve gerektiğinde program esnetilebilmelidir. Belirlenen hedefler gerçekçi olmalıdır ve hedefler belirli aralıkla kontrol edilmeli gerekiyorsa revize edilmelidir. Hâlihazırda bulunulan düzey ve fonksiyonlar periyodik olarak değerlendirilmeli ve korumaya yönelik çalışılmalıdır. Geriatrik bireyin yaşam kalitesini geliştirmeye yardımcı olan, kişin bağımsızlığını artıran ve bu süreçte psikolojik olarak destekleyici şekilde bir rehabilitasyon süreci geçirmesi için özen gösterilmelidir. Geriatrik rehabilitasyon, hastanelerde, rehabilitasyon merkezlerinde, özel bakım evlerinde veya huzurevlerinde uygulanabileceği gibi kişinin kendi evinde de uygulanabilmektedir (46, 47).

gerçekleştirilmiştir. İş aile yaşam çatışması hakkında anket dışında, derinlemesine mülakat tekniği kullanarak görüşmeler yapılması ve böylece çatışmanın altında kalan nedenlerin gün yüzüne çıkarılması araştırmacılara önerilebilmektedir.

Aile iş yaşam çatışması denildiğinde öncelikle akla kadın çalışanlar gelmektedir. Ailevi sorumlulukları eşi ile paylaşmayan veya tek ebeveyn olup çocuklarının tüm sorumluluklarının yüklenen bireylerin iş aile yaşam çatışması yaşaması muhtemeldir. Ailelerin sorumluluk paylaşımını adil bir şekilde yapılması aile iş yaşam çatışmasını büyük ölçüde önleyecektir.

Bu kapsamda ilkokul öğretmenlerinin psikolojik sağlamlıklarındaki düşüklüğün gerçek kaynağını ortaya koymak, bu konuda Covid-19 kaygısını azaltıcı programları uygulamak profesyonelce bir yaklaşım olacaktır. Okulların kurum politikalarına Covid 19 kaygısıyla başa çıkma, pozitif zihinsel sağlığı geliştirme ve psikolojik sağlamlığı artırma süreçleri dahil edilebilir.

çaba göstermediğini çaba gösterse de yanıt alamayacağını düşünmesi soruların cevaplarında kararsız kalmalarına, kısmen katılıyorum veya bir fikrim yok cevabını vermelerine neden olabilir. Bu nedenle olumlu ve olumsuz mükemmeliyet algısı sektörel anlamda irdelenecek ise soruların bu bağlamda revize edilmesi bireysel ve iş yaşamı açısından ayrımının etkin bir biçimde yapılması ve soruların daha net, açık sorulması bu problemleri azaltabilecektir.

olarak daha önce "örgütsel muhalefet" üzerine gerçekleştirilmiş olan çalışmalarla örtüştüğü görülmektedir. Örgütsel muhalefet davranışı olumlu sonuçlarını beraberinde getirdiği gibi olumsuz sonuçlarda doğurabilmektedir. Bu sonuçlar arasında muhalefet davranışının, işletme içerisinde çatışma ve kutuplaşmaların olmasına, işgörenlerde örgütten ayrılma düşüncesi oluşmasında, örgüt içi farklı mobbing davranışlarının oluşması vb. sonuçlara sebep olabileceği yer almaktadır. Sonuç olarak muhalefetin gerçekleştirilmesi durumunda işgörenin göreceği karşılık muhalefetin yönünü de belirlemektedir.

yaşamında stresin ampirik olarak inclenmesi için psikometrik özellikleri sınanmış ölçeklere ihtiyaç duyulmaktadır.

Bu çalışmada House ve Rizzo (1972) tarafından geliştirilen 7 maddeli ve tek faktörden oluşan iş stresi ölçeğinin psikometrik özelliklerinin sınanması amaçlanmıştır. Elde edilen verilere göre ölçeğin faktör yapısı orijinali ve uyarlama çalışması ile uyumlu bulunmuştur. Ayrıca madde analizi ve Cronbach Alfa içse tutarlılık testi bulguları ölçeğin güvenirliğini desteklemektedir.

Bu araştırmanın temel kısıtı örneklem büyüklüğünün çok az sayıda olmasıdır. Bir diğer önemli husus ise ölçeğin geçerliğinin test edilmesi için sadece faktör analizlerine (AFA ve DFA) başvurulmasıdır. Son olarak 7 maddeli iş stresi ölçeği diğer mevcut ölçeklerle birlikte ampirik olarak mukayese edilmemiş, diğer ölçeklerin özellikleri önceki çalışmalara bağlı olarak değerlendirilmiştir. Bundan sonraki araştırmalarda daha büyük örneklemde ve diğer iş stresi ölçeklerinin de yer aldığı bir anket formu ile alternatif ölçeklerle birlikte ilgili 7 maddeli ölçeğin psikometrik özelliklerinin sınanması önerilmektedir.

Sonuç olarak birçok kısıta dayalı (örneklem büyüklüğü, sınırlı sayıda analiz vb.) yürütülen bu çalışmada 7 maddeli iş stresi ölçeğinin geçerli ve güvenilir olduğuna dair ek bulgular elde edilmiştir. Bu bulgular ölçeğin bundan sonraki çalışmalarda kullanılabileceğini göstermektedir.

soruların net ve açık bir şekilde sorulması da bu karmaşıklığı azaltabilecektir.

Araştırmanın sınırlılıklarına rağmen özel bir hastane örneklem alanına sahip bu çalışmanın değişkeni bağlamında literatüre katkı sağlayabileceği düşünülmektedir. Ayrıca kayırmacılık konusunun farklı örneklemler baz alınarak veya farklı araştırma yöntemleriyle tekrar araştırılarak örgütsel davranış literatürünün zenginleşmesine katkıda bulunulabilir. İlave olarak mevcut araştırma, ele alınan değişkene ilişkin algılarını ortaya koymak için katılımcılarla sadece bir kez fikirlerinin edinildiği kesitsel bir araştırma tasarımını içermektedir. Doğru sonuçlara ulaşabilmek adına belirli bir zaman serisinde gerçekleştirilecek araştırmalara yönelmenin fayda sağlayacağı düşünülmektedir. Böylece elde edilen sonuçlar daha genelleştirilebilir.

arasında önemli bir yer tutmaktadır. Örneğin, dersler sırasında hayal kurma olasılığı yüksek olan öğrenciler, hayal kurma olasılığı düşük olan öğrencilere göre sınavlarda daha düşük performans gösterebilmektedirler. Ayrıca, uçağın iniş takımlarını inişten önce açmak gibi bir niyeti gerçekleştirmeyi unutmak gibi bir uç hata örneğinde olduğu gibi ciddi anlamda ağır sonuçların yaşanması da olasılık içerisindedir. Bu nedenle, bilişsel başarısızlıkları incelemek, yalnızca bu tür hatalara yol açan temel mekanizmaların daha iyi anlaşılmasını sağlamakla kalmayacak, aynı zamanda bu tür hataları kimin yapma olasılığının daha iyi anlaşılmasını sağlayacak ve çözüm üretme açısından özgün değer taşıyan eserlerin birikmesine katkı sağlayacaktır (Unsworth vd., 2012:1-16).

Yukarıda arz ve izah edilmeye çalışılan gerekçelerin temelinde yürütülen bu çalışmada, literatüre katkı sunmak ümidiyle, Fırat Üniversitesi bünyesindeki hastanelerin çalışanlarından toplanan verilerle, zihinsel kayıplar ölçeğine ilişkin geçerlilik (açıklayıcı faktör analizi ve doğrulayıcı faktör analizi) ve güvenilirlik analizleri yapılmıştır. Elde edilen bulgular, üç boyutlu yapının toplam varyansın yaklaşık %59'unu açıklayabildiğini, ölçeğin güvenilirlik değerlerinin yüksek olduğunu ve model uyum iyiliği değerlerinin kabul edilebilir sınırlar içerisinde kaldığını göstermektedir.

virüs) salgınının olduğu döneme rastlaması sebebiyle anket tekniği ile 365 kişiye birebir olarak ulaşılabilmiştir. Araştırmanın genellenebilirliği için anketlerin daha fazla sayıdaki katılımcıyla yapılmasının uygun olabileceği düşünülmektedir. Bu araştırmanın farklı sektörlerde (finans ve bankacılık, eğitim, sağlık, turizm vb.) yapılarak, araştırma sonuçların karşılaştırılması önerilebilir.

SONUÇ

Çalışmamızın en önemli amacı literatürde olan sanal kaytarma ölçeklerini tanıtmaktır. Sonrasındaki amaç ise pandemi dönemindeki akademisyenlerin sanal kaytarma eğilimlerinin hangi maddelerde oluştuğunu anlamaya yardımcı olmaktır. Araştırma Sakarya Üniversitesi ve Bitlis Eren Üniversitesinde çalışan akademisyenlerinden toplam 99 kişinin doldurduğu anket formuyla analiz yapılmıştır. Akademisyenlerin çoğu 36-42 yaşların arasında, evli, doktora mezunu, bulunduğu kurumda 11-15 yıl arası çalışanlar ve 10.000 TL üzeri maaş almaktadırlar.

Yapılan araştırmada, açıklayıcı faktör analizi sonucunda; önemli sanal kaytarma olarak tek boyut incelenmiştir. KMO (0,686>.50) ve Bartlett testi (χ^2=133,861; $p < .001$) ile ölçek faktör analizine uygun ve örneklem büyüklüğünün iyi olduğu (Kalaycı, 2010) tespit edilmiştir. Doğrulayıcı faktör analiz sonucu değerlerine göre de ölçek kabul edilebilir değerlere sahiptir.

Akademisyenler üzerine olan sanal kaytarmanın doğrulayıcı faktör analizi yapılmıştır. Çalışmaya katılan akademisyenlere kolayda örneklem yoluyla ulaşılması sebebiyle sonuçlar genellenebilirlik açısından sınırlıdır. Farklı üniversitelerde yapılacak çalışmalarda farklı sonuçlar alınabilir. Farklı boyutlar geçerli olabilir. Ayrıca diğer ölçeklerle de akademisyenler üzerine araştırma yapılabilir. Diğer boyutlar, eposta kullanımı, dinlenme amaçlı internet kullanımı, suistimale açık internet kullanımı, kişisel öğrenme amaçlı internet kullanımı, Paylaşım, alışveriş, durum güncelleme, içerik paylaşımı, oyun/bahis ve belirsiz internet kullanımı gibi sanal kaytarma çeşitlerini ölçmektedir. Bu diğer ölçeklerin farklı boyutlarıyla da daha geniş bulgulara ulaşılabilir.

kültürü, etik iklim konularında yapılacak olan çalışmaların bilgi uçurma davranışının açıklanmasında yararlı olacağı düşünülmektedir. Çalışmanın kısıtları incelendiğinde sadece bir şehir ve kurumda yapılan çalışmanın genellenebilirlik konusunda zayıf olduğunu söylemek mümkündür.

Koro dersine karşı olumlu tutumların ortaya çıkması için; Milli Eğitimin okul öncesi, ilköğretim ve orta öğretim düzeyinde müzik ders saatlerinin arttırılarak alan uzmanı olan müzik öğretmenleri tarafından verilmesi ile öğrencilerinin müzik dersi ile daha erken bir zamanda profesyonel bir bakış açısıyla tanışması ve öğretim müfredatlarında bulunan söyleme ile ilgili kazanımların arttırılarak yıl içerisinde dengeli bir şekilde verilmesi önerilebilir.

Bu araştırmadan yola çıkarak; MEABD öğrencilerin farklı derslere karşı olan tutumlarını belirlemeye yönelik yeni çalışmalar yapılabileceği ve öğrenci tutumlarının değişkenlerinin incelenerek tutum ölçekleri oluşturulabileceği önerilebilir.

Eserlerin büyük bir çoğunluğunda bölmeleri oluşturan cümleler dörder ölçülük ve simetriktir. Eserlerin altı tanesi (%55) minör, beş tanesi (%45) ise majör tonalitelerde yazılmıştır. Eserlerin hepsinde çok sesli doku, kontrpuantal yazı ile oluşturulmuştur. Yan derecelerin, geçici ve işleyici görevdeki ses ve fonksiyonların, ara dominantların, alterasyonsuz akorların ortak alınması ile yakın tonalitelere yönelmelerin de çokça kullanıldığı bu eserler, klasik armoni çalışmalarında da kullanılabilir niteliktedir.

etütte subdominant ailesinden hiçbir fonksiyona yer verilmediği belirlenmiştir.

Piyano çalma becerilerini geliştirme sürecinde, repertuvara alınan etüt ve eserlere ilişkin derinlemesine bilgi sahibi olmanın önemi düşünüldüğünde bu çalışmanın, icracılara olumlu yönde katkı sunacağı; biçimsel ve armonik yönden incelenen etütlerin, sahip oldukları özellikler dolayısıyla besteleme teknikleri, eşlikleme, armoni ve analiz gibi çalışma alanlarının başlangıç düzeyinde de kullanılabilir olduğu değerlendirilmektedir.

oruç ve namazdan muaftır diyor. Türkiye'nin taassuba ve anarşiye itilmesinde bu tür örgütlerin rol oynadığı bilinmektedir. Kısaca her örgütün menfaatı temin zararı giderme anlayışı, o örgütü planlayanların planları doğrultusunda yürütülmekte olduğundan, İslâm örgütlerin menfaatına âlet edilmekte ve amaç değil araç olarak kullanılmaktadır. Bunlar gizli iradelerini ve planlarını gerçekleştirmek için tanrıyı kullanmaktadırlar. Bunu bazen bir İngiliz, bir Rus, bâzen de bir İslâm ülkesinin lideri konumundaki kişiler kullanabilmektedir.

Kısaca politik teoloji bağlamında konuyu değerlendirecek olursak, Hizbullah ve Hizbu't-Tahrîr'in söylemlerindeki ve diğer mezheplerdeki İmamet, önceleri itikadi konular arasında yoktu. Sıffin savaşından sonra Haricilerin ortaya çıkması gerek Harici, gerekse Şii akımların imamet problemine itikadi boyut kazandırması bu problemin itikadileşmesine zemin hazırlamıştır.

a mathematical approach. As a result, PROMETHEE is more successful both in terms of the amount of information it contains and the level of real-life capture. This study can provide a smooth and simple solution to the current chronic problem of objective comparison and selection of MCDM methods. In this sense, we consider that the study will contribute to the literature.

ihtilafına yönelik uygun bir politikanın nasıl olması gerektiği konusunda 2014 ve 2015 yıllarına göre çok daha az birleşmiş durumdadır. Burada Berlin ve Paris›e büyük sorumluluk düşmektedir. Ukrayna›yı siyasi gündemde tutmaları, yaptırımlar konusunda fikir birliğini korumaları, ve Avrupalı ortaklarıyla yakın koordinasyon içinde çatışmaya ilişkin politikalarını daha da geliştirmeleri gerekmektedir. Hükümetler arası ve uluslararası boyuttaki tıkanıklıklar göz önüne alındığında, yerel düzeye özel dikkat gösterilmelidir. Temas hattının her iki tarafındaki insani ıstırap acilen hafifletilmelidir.

Mevcut çatışma, ABD-Rusya ilişkilerini ciddi şekilde gerginleştirmiş ve daha geniş bir Avrupa çatışması riskini artırmıştır. İttifakın güvenlik taahhütleri nedeniyle Rusya ile ABD'nin de dahil olması muhtemel komşu NATO üyesi ülkeler arasında gerilimin artması muhtemeldir. Diğer taraftan Ukrayna'daki çatışma, silahların kontrolü, siber güvenlik, nükleer silahların yayılmasının önlenmesi, enerji güvenliği, terörle mücadele, Suriye, Libya ve başka yerlerdeki siyasi çözümler gibi kritik konularda gelecekteki işbirliği için daha geniş sonuçlara sahip olacaktır.

her şeyden önce toplumun çevre konusunda bilinçlendirilmesi ve çevre eğitimi faaliyetlerinin yaygınlaştırılması gereklidir. Benzer şekilde yeşil bütçelemeye dair tanıtım faaliyetlerinin gerçekleştirilmesi, faaliyetlere yerel örgütlerin, sivil toplum kuruluşlarından temsilcilerin, akademisyenlerin ve vatandaşların dahil edilmesi uygulamaya meşruiyet kazandırılmasında etkili olabilir. Çevresel hedef ve politikalarla uyumlu, çevresel kaygıları kamu gelir ve harcama politikalarında gözeten bir bütçe anlayışının hayata geçirilmesi; sürdürülebilir ve sağlıklı bir ekonomik kalkınma için oldukça önemlidir.

ve idari bilimler fakültesinde yer alan her bölümden çeşitli dersler gördükleri ve işe yaramayan bilgiler edindikleri algısına sahiptir. Bu algı bölümün tam olarak ayrı bir tanımının olmaması ve mezuniyet sonunda net tanımlanmış bir isimle mezun olamamaktan kaynaklanabilir. Diğer yandan maliye bölümü öğrencilerinin ürettikleri metaforlar incelendiğinde geleceğe yönelik olarak olumlu ya da olumsuz algılara sahip oldukları görülmektedir.

Sonuç olarak, çalışma ekonomisi ve endüstri ilişkileri bölümlerinin öğrencilere istihdam olanakları ve iş fırsatları ile birlikte doğru şekilde tanıtılmasının önemli olduğu söylenebilir.

benzeyen bu kavramlar daha etraflıca incelendiğinde, birbirleriyle bazı yönlerden ayrıldıkları görülmektedir.

Nihayet belirtelim ki; Türk sosyal yardım ve sosyal hizmetler sistemini içinde barındıran "primsiz rejimin", sosyal güvenlik sistemimizin adeta bir son halkası olarak merkezi bir örgütlenme çerçevesinde keyfilikten, klientalizmden, nepotizmden, siyasi kayırmacılık ve siyasi popülizmden uzak, çağdaş bir anlayış ile yapılandırılıp, yöneltilmesi; Sosyal Güvenlik Sistemimizin adaletli ve sürdürülebilir olmasının temel koşullarındandır.

Araştırma kapsamında gerçekleştirilen işlemler neticesinde Butler (2007) tarafından geliştirilen İş Okul Kolaylığı Ölçeğinin (Work School Facilitation Scale) Türkçe uyarlamasının, Türk kültürüne uygun, geçerli ve güvenilir bir ölçme aracı olduğu ifade edilebilir.

Uluslararası literatür incelendiği zaman İş-Okul Kolaylığı Ölçeği ile iş-okul doyumu, iş kontrolü, iş talepleri, çalışma saatleri, iş-okul çatışması, okul memnuniyeti, akademik başarı, okula devam (Butler, 2007), sosyal destek (Wyland vd., 2015), iş güvenliği (Owen vd., 2018), öz yeterlilik (O'Conner ve Korr, 1996), kariyer (Horst vd., 2021), stres (Hill, 2005), mutluluk (Culbertson vd., 2012) ve kişilik (Wayne vd., 2004) değişkenleri arası ilişkilerin incelendiği ifade edilebilir.

Zuboff, S. (1988). In the Age of the Smart Machine: The Future of Work and Power. New York NY: Basic Books.

olumsuz bulunma ile ilgili bir yoğunlaşma olmasa da, 18-20 yaş arası gençlerin marka güveni ve bağımlılığı konusunda daha olumlu görüşlere sahip olduğu gözlenmiştir. Diğer yaş, meslek gelir, eğitim ve cinsiyet değişkenlerinde, güven ve bağımlılıkla ilgili yüksek düzeyde olumlu görüşler oluşmuşsa da 18-20 yaş arası gençler tutarlı bir şekilde cevap veren grubu oluşturmuşlardır.

Gerçekleştirilen çalışma, marka kişiliğinin marka sadakatine etkisinde, marka güveninin aracılık rolü olup olmadığını inceleme amacını taşımıştır. Çalışma neticesinde, marka sadakati üzerinde marka kişiliğinin ve marka güveninin olumlu ve anlamlı direk etkileri olduğuna aynı şekilde, marka kişiliğinin marka sadakati oluşturmasında, marka güveninin dolaylı olarakta aracılık etkisi olduğuna karar verilerek H_1, H_2 ve H_3 hipotezleri kabul edilmişlerdir. Ulaşılan sonuçlar değerlendirildiğinde, güvenilir bir kişilik segileyen, marka kişiliği profesyonel, istikrarlı, pozitif hayat enerjisine sahip olarak algılan kişilerin yüksek düzeyde marka sadakati oluşturmalarının daha mümkün olduğu söylenebilir. Gerçekleştirilen bu çalışma ile ulaşılan sonuçlara bakıldığında, daha önceki araştırmaların sonuçları ile uyumlu oldukları görülmektedir. Yani marka kişiliğinin ve marka güveninin, marka bağlılığı üzerinde olumlu etkileri vardır.

2016: 27-28). Toscani'nin bu düşünceleri aktivist unsurları işleyen reklamlar açısından da değerlendirilmelidir.

Bu çalışmada, feminist odaklı reklam ile tüketicisinin dikkatini çekmeye çalışan Audi markasının bu düşünceyi reklamın tamamına yayamadığı görülmüştür. Bunun nedeni, markanın aktivist bir kurum kültüründen uzak olması ve kadın odaklı reklamları hedef kitlenin dikkatini çekecek popüler bir konu alarak görmesi olabilir. Femvertising reklamcılığın, kurumlar için ticari kaygı ile mi yapıldığı tespit edilmelidir. Ticari kaygı ile yapılan aktivist reklamların tüketiciye nasıl yansıdığının ortaya konması önemlidir.

Analiz sonuçlarına bakıldığında, elde edilen sonuçların daha önce hesaplama ve SPSS programıyla yapılan analiz sonuçlarıyla aynı olduğu görülmektedir. Burada elde edilen sonuçlar yorumlanacak olursa Kruskal-Wallis ki-kare değerinin 18,566 olduğu, serbestlik derecesinin 3 ve testin anlamlılık düzeyini gösteren p değerin 0,000336 olarak hesaplandığı görülmektedir. Bu sonuçlara göre H_0 hipotezi reddedilir. Sonuç olarak diyetlerden en az birinin bireylerin kilo vermesine etki yönünden diğerlerinden farklı olduğu tespit edilmiştir.

Kruskal Wallis testi için RStudio'ya yazılan ***komutlar bir bütün olarak*** aşağıda verilmiştir.

Araştırmacılara Tavsiyeler

Araştırmacılar buradaki RR ölçüm prosedürünü kullanarak TOPSIS, VIKOR, PROMETHEE, MABAC, FUCA gibi farklı yöntemlerin RR duyarlılığını karşılaştırabilirler. Böylece ÇKKV seçimi için pek çok başka çerçeve ile birlikte RR kriterini de göz önüne almış olurlar. Ayrıca normalizasyon RR'de etkili olduğundan normalizasyonsuz çalışabilen PROMETHEE ve FUCA gibi ÇKKV yöntemlerinin RR problemi üretip üretmediklerini saptayabilirler.

Fornes, bu oyununda kadının toplumdaki konumunun ve kadına bakış açısının değişmesi için kadınların kendi sosyal ve psikolojik durumlarını irdelemeleri ve buna çözüm aramaları gerektiğini vurgular. Kadınların toplumdaki rolünü ve konumunu aydınlatıcı bir söylemle gündeme getirir. Fornes, kadın psikolojisini tasvir ederken, yaptığı karakter çözümlemeleri ile erkek merkezli bir kültürün kurbanları olan kadınların durumunu somutlaştırır. Kadın, erkek egemen toplum baskılarından sıyrılabilmek ve bağımsız bir hayata erişebilmek için kendi amaçlarının ve duygularının izini sürmelidir. Oyun, kendisini sınırlayan normlara uyum sağlamayı reddeden kadının; yeni formlar, yeni anlamlar ve yeni bir gerçeklik yaratma mücadelesini sahneye koymaktadır. Fornes, her biri ayrı ayrı teşhir edilen kadın karakterlere, maddi olarak hiçbir erkek gücünün olmadığı bir dünyada gerçek benliğini özgürce ifade etme ve kendisi gibi davranma fırsatı vererek; ataerkil kültürün kadınlar üzerindeki içsel psikolojik etkilerini ortaya çıkarmaktadır.

mürekkep emiciliğinin daha fazla olmasından kaynaklı, baskı renklerinin daha heterojen ve daha az net basılmasına neden olur. Ancak kaplanmamış kağıtlar harika dokunuş hissi, okuma sırasında yansıma yapmayan yüzeyi ve doğal görünümü nedeniyle okuyucular tarafından tercih edilmektedir. Kaplamsız kağıtların yüzeyleri gözenekli olduğundan dolma kalem, kurşun kalem ve tükenmez kalemle yazı yazılan evrak baskısında da kaplanmış kağıtlara göre daha uygundur.

Baskılarda kağıt türü tercihlerinde kaplamasız kağıtların avantaj ve dezavantajları göz önünde bulundurularak tercih edilmesi tavsiye edilir.

sahip olduklarını görmekteyiz. Hastane mekânına giriş, tıbbi prosedürler ve mekândan çıkışı bir bütün olarak yaşayan kullanıcı gözünden baktığımızda bütünsel olmayan tasarım uygulamalarının deneyim tasarımı üzerinde daha az etkili olacağı düşünülmektedir. Mekânın sadece belirli bir bölgesinde değil genel olarak her alanına uygulanan çevresel tasarımlar aslında hastaların mekân deneyimi geliştiren en önemli etkendir. Bu açıdan bakıldığında mekânın geneli ile bütünleşen dijital grafik tasarımı uygulamalarının hastanın mekân algısını tümüyle olumlu yönde değiştirerek, sağlık mekânları tasarımına yeni bir bakış açısı kattığını söyleyebiliriz.

Ancak antikoagülan ve antiplatelet ilaç kullanan bireylerde omega-3 yağ asitlerinin takviye edilmesi durumunda, hastaların sorumlu hekim tarafından izlenmesi önemlidir (Lieb vd., 2010:9).

SONUÇ VE ÖNERİLER

Diyette omega-3 yağ asitlerinin yetersiz alınması çeşitli mental hastalıkların gelişme riskini artırabilir. Bununla birlikte omega-3 yağ asidi takviyesinin mental hastalıklar üzerindeki terapötik etkilerini araştıran çalışmalardan net bir sonuç elde edilemediği görülmektedir. Ayrıca her çalışmada omega-3 yağ asitleri farklı doz ve sürelerde verildiği için mental hastalıklarda optimal doz ve süre konusu belirsizdir. Takviye formunda bulunan omega-3 yağ asitlerinde oksidatif bozulmanın görülebilmesi ve bunu önlemek için eklenen E vitamininin uzun süreli kullanımında sağlık üzerine bazı risklerinin bulunması endişe vericidir. Bu nedenle mental hastalıkların önlenmesi ve tedavisi için omega-3 yağ asitlerinin etkinliğini değerlendiren ve takviyelerin uzun süreli kullanımında görülebilecek yan etkileri araştıran prospektif klinik çalışmalara ihtiyaç bulunmaktadır. Ancak mental sağlığı korumak, kronik inflamatuar hastalıklara yakalanma riskini azaltmak ve hastalık prognozunu olumlu yönde etkilemek amacı ile günlük diyete ceviz, badem ve semizotu gibi omega-3 kaynaklarının eklenmesi ve haftada 2 kez balık (200-350 g) tüketilmesi önerilmektedir.

benzerlik göstermektedir. İnflamatuar faz insandaki akut intestinal inflamasyonuna bazı benzerlikler gösterir. Çeşitli çalışmalarda kullanılmış olan antioksidan ilaçlar ile yapılan tedavi, bu modelde gözlemlenen patolojik bulguları iyileştirmiştir (Kim ve Berstad, 1992; El-Desoky Mohamady vd., 2022).

SONUÇ

Farmakoloji araştırmalarında deney planlamasını yapabilmek araştırmanın tasarımı için çok önemli bir meziyettir. Verilen bilgiler ışığında doğru araştırma metotları seçildiğinde yapılacak ilaç denemesini uygulamak, sonuçları toplayıp analizini yapmak çok daha kolay olmaktadır.

Birçok laboratuvar metodu farmakoloji ve toksikoloji çalışmalarında geçmişte kullanılmıştır. Geçen zaman içinde bazıları kullanımını yitirse de çoğu yöntem geliştirilerek bugünkü halini almıştır.

Bu denli fazla metot olması karmaşık gibi görünse de yapacağımız araştırmaya uygun kriterler belirlendiğinde doğru metotlar seçilmiş olur. Örneğin maliyet, süre, hassasiyet vb. gibi parametrelere göre metotlar değerlendirilir ve araştırmaya en uygun hangisi olacaksa o yöntem tercih edilir.

Yeni geliştirilen yöntemler sayesinde birçok biyokimyasal parametrelerin çok hassas bir şekilde ölçülmesine karşın maliyetlerin yüksekliği de araştırmacıları düşündürmektedir.

stabiliteleriyle ilgilidir. Stabilite, lipozom hazırlama, saklama ve sonraki uygulama adımları için ana endişe olarak kabul edilir. Lipozomların potansiyel kararsızlık sorunları tipik olarak lipidlerin oksidasyonu ve/veya hidrolizi, ilaç sızıntısı, agrega oluşumu ve hatta lipozomal füzyon ile ilgilidir (Immordino vd., 2006). Lipozom formülasyonlarının diğer bir zorluğu, uygun bir büyük ölçekli üretim yönteminin belirlenmesi ve lipozomlar için verimli bir sterilizasyon tekniği bulma ihtiyaçlarıdır. AITS (Akıllı İlaç Taşıma Sistemleri) 'lerin olasılığı oldukça umut verici olsa da, nanotaşıyıcıların insan organlarındaki toksisitesi büyük bir endişe kaynağıdır (Guimarães vd.,2021).

Gelecek Perspektifi

Lipozomlar, çok sayıda ilaç türü için ilaç dağıtım sistemi olarak geniş ilgi görmüştür. Lipozomların tıpta doğrudan uygulanması, araştırmacıları çeşitli terapötik uygulamaların yanı sıra çok çeşitli hastalıklarda tedavi ve teşhis için yeni lipozomlar yapmaya teşvik eder. Lipozomal tedavi bağlamında, *in vivo* ilaç davranışının modülasyonu ve organizmada ilaç toksisitesinin azaltılması, uygun bir lipozomal formülasyon tasarlamak için çok önemli özelliklerdir. Uygun bir lipozomal formülasyon ürünü, üç temel bileşenden oluşur: bir lipozom oluşturmak için lipidler, bunları işlevselleştirecek moleküller ve kapsüllenecek bir ilaç molekülü. Lipozomların geliştirilmesi ve iyileştirilmesi, güvenli ve etkili bir nihai lipozom formülasyonu elde etmek için birkaç parametrenin eşzamanlı optimizasyonunu içeren karmaşık bir zorluktur. Aslında birçok sağlık alanını kapsayan piyasada onaylanmış bazı lipozomlar olmasına rağmen, lipozom teknolojisi alanında hala yapılması gereken çok şey olduğunu söylemek mümkündür. Özetle, lipozomlar anahtar performansa sahip tedavilere katkıda bulunabilir. Dolayısıyla geliştirilen teknolojiler ve tekniklerle birlikte daha iyi bir klinik sonuca ulaşıp daha düşük toksisite ve daha az yan etkiye yol açacaktır (Hossen vd., 2018; Guimarães vd.,2021).

3. SONUÇ

Ağrı, yoğun bakımda yaygın bir sorundur ve kötü değerlendirilip yönetilmektedir. Ağrı, çoklu organ sistemlerini olumsuz yönde etkiler ve yetersiz yönetilen ağrının sonuçlara doğrudan etkisi vardır. Ağrıyı yönetirken, düzenli değerlendirme ve protokol tabanlı multimodal analjezik rejimi kullanarak vurgu yapılmalıdır. Analjezik ilaçların seçimi ile ilgili karar da yoğun bakım ünitesinde meydana gelebilecek çeşitli fizyolojik düzensizlikler ve aynı zamanda bu ilaçların organ hasarına neden olma potansiyelide hesaba katılmalıdır (Narayanan vd., 2016). YBÜ hastalarında ağrının doğru değerlendirilmesi ve uygun şekilde tedavi edilmesi, hastaların sonuçlarını iyileştirecek, bu da stres yanıtını azaltacak ve travma sonrası stres bozukluğu riskini azaltacaktır. Ağrı yönetimindeki potansiyel engelleri en aza indirmek için hemşireler uygun stratejiler, kritik hastalardaki etkili ağrı yönetimini oluşturmak için uygulama rehberlerini kullanabilirler. Mevcut hemşirelik müfredatının ve tıbbi programların, kritik hastalardaki ağrının giderilmesi için güncellenmiş stratejileri içerecek şekilde güncellemesine yönelik acil bir ihtiyaç vardır. Yoğun bakım hemşirelerine sürekli ağrı yönetimi ile ilgili eğitim verilmeli ve bu eğitim; ağrı semptomları, ağrı değerlendirmesi, analjezi mekanizmaları, analjezinin değerlendirilmesi, analjezik ilaçların etkileri ve yan etkileri ile farmakolojik olmayan ağrı yönetimi gibi konuları içermelidir.

Ayrıca, $S_1 \times S_2$ de (1.1) probleminin bir diğer (h^*,k^*) çözümü ise, Lemma 3.3 den aşağıdaki eşitsizlikler geçerlidir;

$$\bar{h} \geq h^* \text{ ve } \bar{k} \geq k^*,$$
$$h^* \geq \underline{h} \text{ ve } k^* \geq \underline{k},$$

ve

$$\bar{h} \geq h^* \geq \underline{h},$$
$$\bar{k} \geq k^* \geq \underline{k}.$$

Buradan da, $\bar{h} = h^* = \underline{h}$ ve $\bar{k} = k^* = \underline{k}$ eşitliği elde edilir. Böylece, (h^*,k^*) (1.1) probleminin tek çözümü vardır.

cooperation with the university on this issue and enter into cooperatives will enable the production to spread more and the income to be increased.

However, the quality seed that responds to manufacturer-industriallist demands must be reformed and a standardization must be set in the seeds. Different types of thyme that grow in our country must be separated according to their content and the thyme should be evaluated in the pharmaceutical and food industry according to these types. Thyme is a plant with a very high added value. Thyme producers should be trained on the use of these products in different ways, and a bridge should be established between the producer and the industrialist. Brand management is important in Denizli thyme. Cooperation with universities in thyme production is important in terms of guiding the producers in this regard.

Research in the field of consumer behavior is inherently constrained by a number of limitations. The main limitation of this study is that the sample size and characteristics of the sample do not allow generalization for all consumers. However, findings of a correlation among hedonic consumption, impulse buying behaviors, and the level of mindfulness, which is a psychological factor, have been reached. Since these findings are a first in the field, they will be the starting point for other studies in the literature.

Ensuing studies, conducting research with samples reflecting different income and professional groups, will increase the comparability and generalizability of the findings. In subsequent studies, a model of hedonic consumption and impulse buying that deals with different and various psychological variables such as mindfulness, depression tendency, self-control, anxiety, and stress can be implemented. The relationship between mindfulness and compulsive buying behavior can also be investigated in future studies. With an experimental perspective, mind trainings can be conducted to increase the mindfulness of consumers who exhibit impulse buying or compulsive buying behavior, and the changes in behavior can be observed. Thus, this research can allow more contributions to the literature through different methods.
